

Dear PHS Students, Parents and Stakeholders,

This statement is to inform the stakeholders of PHS that the school has been identified as a Comprehensive Support School for the reason of a Low Graduation Rate. It is important that the PHS community is made aware of the measures being taken to improve upon our graduation rate.

We have built in extra time and opportunities during our 'Flex Friday' schedules to allow for the following actions that directly influence our students' graduation opportunities:

- Individual and small-group tutoring to help students complete missing or failing work in their classes.
- Extra periods to work with a teacher on their credit recovery coursework which leads to acceleration and early completion of these credits.
- Enrichment and community-building activities to keep students actively involved at PHS by increasing their sense of belonging to our community, which leads to increased attendance, ownership, and participation in school.

These additional measures are specifically aimed to increase attendance, academic performance, and credit recovery efforts, all of which lead to successful graduation from high school.
